3,60/5	4,50/5	6,00/5	14,10/15

RESULT FOR MISSIONS - CZECH REPUBLIC: N/A

RESULT FOR MISSIONS - GERMANY: Pre-selected

FEEDBACK FROM EVALUATORS

EVALUATOR 1

Photin has a clear goal for the Stuttgart mission: connect with PhotonicsBW members. The CEO/Lead engineer would be the participant to the mission, with clear knowledge of the needs of the company & the technology side.

EVALUATOR 2

Connecting a Polish raw-material and component manufacturer with the German automotive integration ecosystem represents a strong and well-justified cross-border synergy. The proposal articulates the strategic relevance of the mission and outlines credible long-term benefits, demonstrating good alignment with growth objectives. The SME shows adequate readiness to engage with the host ecosystem and explore collaboration opportunities, with a reasonable - though moderately ambitious - approach to partnership building. The team demonstrates solid expertise and a relevant value proposition, providing a sound basis for engagement. Overall, the mission is well positioned to generate meaningful outcomes, while further sharpening the partnership strategy and ambition could enhance its potential impact.

The final score calculations have been conducted in strict accordance with the established guidelines for applicants. The opinions by the reviewers are subjective and may not be the same. Applicants may have different opinions about the outcome and opinions of the evaluators. PhotonQBoost open call team will not provide an opinion over the evaluators' opinion and scores unless a factual error is detected.

What happens next:

If you have been selected for at least one of the Missions you applied for, you will soon receive an email with the next steps. Please make sure to provide any requested information or additional documentation on time so we can complete the assessment of your application.

If you were not selected this time, we would still be delighted to support your innovation journey. Discover how PhotonQBoost's free-of-charge services can help you and express your interest [HERE](#) and keep an eye for the next Open Call that will be launched in the Q4 of 2026!

Information on the appealing process

The PhotonQBoost consortium has established a process that allows applicants to appeal the consortium's decision if their proposal is not selected for funding. If, at any point during the evaluation process, an applicant believes that there have been deficiencies in how their proposal was assessed, potentially affecting the final funding decision, or if they believe that the results of eligibility checks are incorrect and do not adhere to the rules of the open call, resulting in harm to their interests, they may appeal following the procedure outlined in the guidelines for applicants.

Best regards,

The PhotonQBoost Team
